Brake Bleeders

Also suitable for bleeding other closed fluid systems

DRIVEN BY AIR.

Brake Bleeders

PCL Brake Bleeders are used for bleeding and refilling the brake systems of all types of vehicles, quickly and cleanly by a single person.

They are also suitable for bleeding other closed fluid systems. However, they must never be used for explosive fluids, i.e. petrol and acetone.

- Simple, single person operation
- Quick, clean and efficient
- Does not require specialised brake reservoir caps
- Draws fluid from the bleed nipple enabling either bleeding or full replacement of fluid in system

BB143112

Brake Bleeder c/w Replenishment System

Working Pressure: 6-12 bar (87-174 psi)
Air Consumption @ 8 bar: 180 l/min (6.4 cfm)
Container: 1.2 litre
Vacuum: min 60%
Air Inlet: Rp 1/4

BB143102

Brake Bleeder

Working Pressure: 6-12 bar (87-174 psi)
Air Consumption @ 8 bar: 180 l/min (6.4 cfm)
Container: 1.2 litre
Vacuum: min 60%
Air Inlet: Rp 1/4

Part Number	Description	List Price
BB143102	Brake Bleeder	£59.95
BB143112	Brake Bleeder with replenishment system	£99.95
